

REMARKS

During the preparation of the declaration in connection with application serial number 07/231,671, filed August 12, 1988, a divisional of the present case, it was discovered that the errors on page 11 corrected in the Information Disclosure Statement and Preliminary Amendment filed November 5, 1986 in parent application serial number 839,215 filed March 13, 1986 had not been completely corrected. Review of the original Anson et al paper (page 1053, a copy of which is attached) reveals that clone cVI had 24 and not 25 nucleotides missing and that the sequence of the first 15 nucleotides was "inverted and complementary". Page 11 of the present application has accordingly been further amended in order to completely correct the application. For completeness, attached is a copy of the above-mentioned declaration by Professor Brownlee where these corrections are discussed.

Early and favorable action on the present application in light of the present paper and the response of August 23, 1991 is awaited.

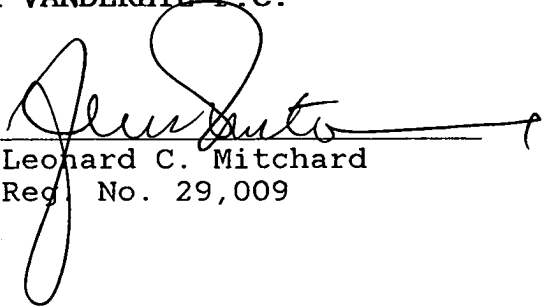

ANSON et al
Serial No. 07/403,784

- 3 -

Respectfully submitted,

NIXON & VANDERHYTE P.C.
